America's Favourite Fire

Lopi gas stoves and fireplace inserts have been America's favourite choice in fire for over twenty-five years. Our reputation for solid craftsmanship, reliable performance and unbeatable heating efficiency has been a winning combination year after year, and the favourite fire of families across the nation.

We start with a heavy-gauge steel firebox for quality inside and out. Notice the detail and beauty in the logset, creating a warm glowing fire. The design is your choice thanks to a large range of face options and accessories.

The 564 features the direct vent chimney system which is designed to pull combustion air from outside as well as expel its exhaust through a single pipe. This sealed system preserves your home's indoor air quality by preventing combustion by-products from entering your home. With its narrow profile and wide fire viewing area the 564 gives you the ability to add heat, fire and beauty to almost any room in your home, and with minimum clearances to combustibles you have the option to stone, tile or gyprock all the way up to the face reducing installation time and costs.

Features

- Approved convection space heater (high efficiency)
- Thin profile - only 412mm deep
- 564 square inches of fire viewing glass
- Removable safety screen in front of glass
- Two level pan burner for realistic flame pattern

Clearances to Combustibles

See owners manual for non-combustible clearances

Improper installation of your gas appliance or failure to operate it in accordance to the guidelines detailed in the Owner's Manual may negate your warranty and endanger your home and family. Installation information is available on our website at: www.lopi.com.au. We recommend all Lopi appliances be installed and maintained on an annual basis by your local authorised Lopi dealer.
